

I am greatly concerned about the misuse of public airwaves by Sinclair Broadcast Group. They are planning to air an anti-Kerry program before the election to sway the public to support the political party that supports their burgeoning economic interests. It is undemocratic and illegal to use their monopolization of public airwaves to push the political party that supports their interests. Rather, it is their job to present the full range of public and political opinion, equally! It is your job to ensure that they do this and that our precious democracy is upheld. Thank you so very much for attending to this.
